

Contents

PART I: INTRODUCTION

CHAPTER 1: ASSESSING THE FUTURE OF BIOSCIENCES.....	7
Defining the Biosciences Space.....	8
The Scenario Planning Approach.....	10
CHAPTER 2: BIOSCIENCES TODAY	17
The Remarkable March of Technology.....	17
Nanotechnology and Bioinformatics.....	22
Industry and Technology Convergence.....	24
The Current Pharma Business Model.....	26
Developed vs. Developing Market Needs.....	31

PART II: FOUR SCENARIOS FOR THE FUTURE OF BIOSCIENCES 37

CHAPTER 3: SCENARIO A – WHERE’S THE BEEF?.....	38
Scenario A: How We Got Here.....	39
Themes in Scenario A: The World We Live In.....	42
Scenario A: How We Live In This World.....	43
CHAPTER 4: SCENARIO B – NEW AGE OF MEDICINE.....	47
Scenario B: How We Got Here	48
Themes in Scenario B: The World We Live In.....	51
Scenario B: How We Live In This World	52
CHAPTER 5: SCENARIO C – BIO-GRIDLOCK.....	56
Scenario C: How We Got Here	57
Themes in Scenario C: The World We Live In.....	59
Scenario C: How We Live In This World	60
CHAPTER 6: SCENARIO D – SCIENCE HELD HOSTAGE.....	63
Scenario D: How We Got Here	64
Themes in Scenario D: The World We Live In.....	67
Scenario D: How We Live In This World.....	68

PART III: NEXT STEPS 101

CHAPTER 7: PROFITING FROM UNCERTAINTY	101
Step 1: Depict Multiple Futures.....	103
Step 2: Develop a Flexible Strategy.....	104
Lessons for Managing Emerging Technologies	107
Organizational Strategies for Innovation.....	109

Appendices

I. DRIVERS OF CHANGE	82
Long Term Trends	83
Key Uncertainties	92
The Role of Stakeholders	99
II. SYSTEM DYNAMIC MODELING	104
The Basic Model	104
Simulation	115
Technical Notes and Equations	123
III. BIBLIOGRAPHY	127
